

- ★ Take part in reef examinations
- ★ Explore the great variety of coral reefs
- ★ Perceive human impacts upon ecosystems
- ★ Collect scientific data
- ★ REEF CHECK - Saving reefs worldwide

**Requirements:**

It is required to have good buoyancy skills and a minimum of 30 logged dives.  
Language: English and German.

**About REEF CHECK:**  
 REEF CHECK is the world's largest international coral reef monitoring organization involving volunteer recreational divers and marine scientists.  
 REEF CHECK began in 1996 in order to survey the world's coral reefs using one standardized method so that survey results could be compared wherever they were carried out. These data about the health of coral reefs are essential to face and reverse the decline of the world's coral reef ecosystems. The REEF CHECK protocol is focused on the abundance of particular coral reef organisms that best reflect the condition of the ecosystem and that are easy to recognize by the public. The techniques are simple to learn and the data are scientifically robust. REEF CHECK serves as the first step in attracting participation in coral reef management activities.
